ATTENTION!

Chest, waist and hip sizes are measured on the body. ‚Arm length sweater‘ and ‚length sweater‘ are measured on the sweaters!

HOW TO MEASURE:

CHEST

Measure around your own chest and write down your size in cm.

WAIST

Measure around your own waist and write down your size in cm. Your waist is the narrow part between your hips and ribs. Don't hold in your tummy!

HIP

Measure around your own hip and write down your size in cm. Your hip is the largest part of your buttocks.

SLEEVE LENGTH

Measure your own arm length. Measure from the top of your shoulder (where your collarbone ends) to just past your wrist bone to where you would like your sleeve to end. Always slightly bend the elbow when measuring to allow for extra ease.

LENGTH SWEATER

Measure from the highest point of your shoulder (its where your neckline begins) straight down to where you measured your hip line. (Most of the time this is a few centimetres below your belt.)

After you measured, look at the size guide. The chest and hip sizes are more important than your waist size! After you know your size, look at the length sizes. Are you a better fit for a TALL or a normal size? The length sizes on the size guide are measure on the sweaters, so these are the lengths you'll get!
